Sunrise's Big Dish provides superior commercial solutions due to its high solar-steam and solar-to-electric conversion efficiency. It can be configured to generate temperatures ranging from 100° C to 600° C and a pressure range of 1 bar to 160 bar for power and various thermal applications.

We also offer high-temperature steam ideal for long-duration thermal energy storage like molten salt storage, thermal oil storage, or pressurized hot water storage.

From this storage, steam can be generated on-demand to meet the steam needs of varying industries:

- grid-scale electricity generators
- manufacturers needing high-temperature process for heat and electricity cogeneration
- companies and institutions needing lower temperature heat for space conditioning
- waste and water treatment
- institutional cooking, and many other applications

From revolution to passion. From belief to style. From fiber to fashion. We transform the future of Jute and cotton canvas fabric. We are Jutify!

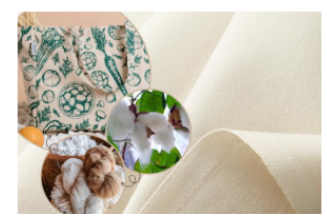

Jutify is more than just a manufacturing company – it is a revolution, an initiative, a belief and a passion. Jutify comes from the largest jute conglomerate in India – supporting the families of **18,000 workers** across our **4 jute mills**.

We are involved in the entire process of jute production, from fibre to finished bag in jute fabrics. Exporting more than 10 million bags a year, Jutify is committed to saving the world one bag at a time.

To know more about our production facilities & company, please visit jutify.com

Jute also known as the **Golden Fibre**, is the most economical and durable natural fibre with various applications ranging from packaging, fashion, shopping bags, infrastructure to nursery. Jute bags are durable, long-lasting and available in a wide range of styles and designs.

Cotton bags are a sustainable alternative to single-use plastic bags, as they are made from a renewable and biodegradable material. Their durability allows for repeated use, reducing the need for disposable bags. Cotton bags come in various sizes and styles, making them versatile for different purposes.

motionery.market

B2B Industrial Hardware

One of the largest online platforms in India for bearings (and industrial hardware). Their extensive inventory of over 50,000+ SKUs and products from trusted brands and suppliers ensures that manufacturing units can find all their requirements vis-a-vis capital goods at one place.

The screenshot shows the search interface of motionery.market. It features a purple header with the logo. Below the header, there are eight search input fields arranged in two rows. The first row includes fields for 'Item Number', 'Suffix', 'Brand', and 'Category Name'. The second row includes fields for 'ID MM', 'OD MM', 'Width MM', and 'Weight KG'. A blue 'Search' button is positioned below the second row of fields.

Bespoke System: PHP (Laravel), MySQL

Timeline: 20 weeks

motionery.market

We are one of the largest online platforms in India for bearings. Our extensive inventory of products from trusted brands and suppliers ensures that you can find everything you need at one place.

Process Automation System for Land Development Firm

A web-based project management system for a land development firm to streamline project coordination. It offers real-time collaboration, task assignment and progress tracking. Users can upload project plans, communicate within the platform and monitor project timelines. The system generates reports, alerts for milestones and resource allocation insights - enhancing efficiency and reducing manual paperwork. It centralises project data, fostering seamless teamwork and informed decision-making, ultimately improving project outcomes and reducing administrative overhead.

Bespoke System: PHP (Laravel), MySQL
Timeline: 32 weeks

Process Automation system for Schools

Parents of prospective students submit applications online. Admissions staff review applications, schedule school visits and communicate decisions through the platform. Once accepted, parents can easily pay fees securely online, using 150+ payment options. The system generates automated notifications, tracks payment statuses and provides real-time financial reports for efficient school management. This user-friendly system enhances convenience for both applicants and school administrators while reducing paperwork and manual tasks, improving overall efficiency in the admissions and fee payment process.

Bespoke System: PHP (Laravel), MySQL
Timeline: 20 weeks

The screenshot displays a web dashboard for a school management system. On the left is a sidebar menu with categories: MAIN (Dashboard, Centers, Programs, Batches, Batches, Open Day), REPORTS (Admissions, Payments, New Payment Module), and a highlighted 'New Payment Module'. The main content area is titled 'Dashboard / Students' and features a 'Student List' section. A dropdown menu shows '10 entries'. Below is a table with columns: STUDENT ID, BRANCH, CLASS, PERIOD, STUDENT NAME, and FATHER NAME. The table contains five rows of student data. At the bottom, it says 'Showing 1 to 5 of 5 entries'.

STUDENT ID	BRANCH	CLASS	PERIOD	STUDENT NAME	FATHER NAME
HF09	Hungerford	Prek	Oct-Dec 2023	Rahee	Amish
HF10	Saltlake	KG	Oct-Dec 2023	Stl	Sugam
HF11	Saltlake	KG	Oct-Dec 2023	Stl	Sugam
